2026

SEP	Thursday, September 3, 2026 6:30 - 8:30 PM Carmel Country Club Live Mentalist Show • (0) CE Credits <i>Bryan Saint</i> • Magician	KICK OFF
OCT	Thursday, October 1, 2026 6:30 - 8:30 PM Carmel Country Club Live Webinar – The Great Frontier: Integrative Dental Medicine <i>Dr. Dewitt Wilkerson</i> • (2) CE Credits	
NOV	Thursday, November 5, 2026 6:30 - 8:30 PM Carmel Country Club All-on-4 Clinical Workflows <i>Dr. Riddhi Patel</i> • (2) CE Credits	
DEC	Friday, December 4, 2026 9:00 AM - 3 PM Carmel Country Club Full-Day Signature CE Program – Lab Techs invited! <i>The Cinderella Subject: How to Deliver Beautiful Functional Dentures</i> <i>Dr. Finlay Sutton</i> • (6) CE Credits	HANDS-ON LEARNING!

2027

JAN	Thursday, January 7, 2027 6:30 PM - 8:30 PM Carmel Country Club Vault Recording – Worn But Not Forgotten: Mastering Treatment Planning <i>Dr. Mario Rotella</i> • (2) CE Credits	
FEB	Thursday, February 4 6:30 PM - 8:30 PM Carmel Country Club Live Webinar – Function First: Comprehensive Treatment Planning <i>Dr. Corey Anolik</i> • (2) CE Credits	
MAR	Thursday, March 4, 2027 6:30 PM - 8:30 PM Carmel Country Club Vault Recording – Ortho-Restorative Connection Treatment Planning <i>Dr. Sunny Viridi</i> • (2) CE Credits	
APR	Thursday, April 1, 2027 6:30 PM - 8:30 PM Carmel Country Club Live Webinar – NC Dental Opioid Update <i>Dr. Bill Claytor</i> • (2) CE Credits	
MAY	Friday, May 7, 2027 1:00 PM - 6:00 PM Carmel Country Club Full-Day Signature CE Program – What Really Matters in Life <i>Dr. Sreenivas Koka</i> • (5) CE Credits	FRIDAY FULL DAY

Please let us know if you have any questions about a specific course – we'd be happy to assist answer them.

Up to 23 Credits Available

Introduction

Welcome to this year's academic season, **Mastery in Motion**, where expertise is continually refined, and excellence is never static. This season brings together forward-thinking clinicians who recognize that true mastery is not a fixed endpoint, but an ongoing pursuit shaped by learning, innovation and purposeful action.

Throughout the year, we will explore how knowledge evolves into skill, and skill into confident execution. Together, we will challenge assumptions, elevate clinical precision, and respond thoughtfully to the ever-advancing landscape of dentistry. Each session is designed to translate insight into action, empowering participants to move seamlessly from concept to chairside application.

Mastery in Motion is more than the advancement of technique. It reflects a shared commitment to growth, collaboration, and exceptional patient care. As a community, we move forward together, sharpening our craft, strengthening our connections, and ensuring that progress is not only achieved but sustained

SEPTEMBER 26'

Bryan Saint
Magician

Bryan Saint is a nationally recognized entertainer with multiple TV appearances, millions of YouTube views, and **two wins** on the hit primetime show **Penn & Teller: Fool Us**.

He has headlined top magic venues including The Magic Castle in Hollywood and House of Cards in Nashville.

Based in Charlotte for over 20 years, Bryan has performed across the U.S. and virtually worldwide, entertaining Fortune 500 audiences and celebrities like Nicolas Cage, Rory McIlroy, and Evan Spiegel.

He has also consulted for other magicians and written material performed by Penn & Teller.

Lecture up to 0 hours

Entertainment Kick-Off Session — CE credits not provided.

Live Mentalist Show

A nationally recognized performer, Bryan delivers an exclusive VIP experience by incorporating audience decisions and personal items to create a fully customized, one-of-a-kind magic show.

With over 20 years of stage experience and a 70%+ repeat client rate, his performances are among the most sought-after in corporate entertainment.

No two shows are ever the same — this is a truly unique experience you won't want to miss.

OCTOBER 26'
Dr. Dewitt Wilkerson

Lecture up to 2 hours

730 — Oral Medicine, Oral Diagnosis, Oral Pathology

Dr. DeWitt “Witt” Wilkerson joined Dawson Academy in 1982, building 40+ years of experience in a world-renowned clinical setting. He lectures globally on restorative dentistry, occlusion, TMJ, airway/sleep medicine, and integrative care, training over 10,000 dentists.

He is author of *The Shift*, Founder & CEO of IDM Scholar Society, past president of AAOSH and the American Equilibration Society, adjunct professor at University of Florida College of Dentistry, and lecturer at the L.D. Pankey Institute. He also contributes to American Dental Association initiatives.

Married with three children and five grandchildren, he enjoys golf, travel, and dental mission trips.

The Great Frontier: Integrative Dental Medicine

There are some very important shifts in dental & medical research clinical applications that are changing the way we understand, diagnose, prioritize and treat our patients. Oral bacterial infections are causing body wide inflammation, salivary testing can identify and guide treatment. Allergies can cause conversions from nasal to mouth breathing and sleep apnea, home sleep screening & testing can identify the problem and guide treatment.

Airway & sleep problems can also drive bruxism, tooth wear, sore muscles, headaches, TMD & dental malocclusions. In this engaging and empowering presentation Dr Wilkerson will discuss new insights into the critical connection between inflammation, breathing disordered sleep, TMD and dental malocclusions.

Upon completion of this session, attendees should be able to:

- Identify key clinical signs of airway-related disorders and understand how sleep, breathing dysfunction, and inflammation contribute to tooth wear, TMD, and malocclusion.
- Incorporate salivary testing and basic sleep screening into routine evaluations to improve early diagnosis and guide collaborative, wholehealth treatment planning.

NOVEMBER 26'

Dr. Riddhi Patel

Dr. Riddhi Patel is a board-certified oral and maxillofacial surgeon and owner of two successful practices in Tega Cay, SC and Charlotte, NC, where she provides exceptional, patient-centered care at Harmony Oral and Facial Surgery.

She earned her DMD from the University of Pennsylvania and completed her residency at Mount Sinai Hospital in New York, with advanced training in dental implants, bone grafting, wisdom teeth removal, facial trauma, and corrective jaw surgery. Dr. Patel is committed to personalized treatment and stays at the forefront of her field through continuing education and advanced technology.

Outside of work, she enjoys time with family, the outdoors, cooking Mexican-Indian fusion cuisine, and acrylic painting.

Lecture up to 2 hours

690—Implants

All-on-4 Clinical Workflows

This 2-hour lecture helps restorative dentists and specialists refine and modernize their digital workflow for full-arch immediate implant cases. Dr. Riddhi Patel will present a prosthetically driven, freehand surgical approach that uses digital planning to improve precision, efficiency, and esthetic outcomes.

Participants will learn how CBCT, intraoral scans, facial photography, and photogrammetry work together to create a seamless workflow—from diagnosis to final restoration — with an emphasis on starting restorative planning before implant placement.

Through a full-arch case review, topics include:

- Integrating CBCT and intraoral scans for implant positioning
- Using facial photography and smile design in planning
- Improving accuracy with photogrammetry
- Designing esthetic, functional immediate provisionals
- Enhancing lab communication to reduce remakes
- Increasing efficiency and improving patient experience

DECEMBER 26'

Dr. Finlay Sutton

Prosthodontist

Dr. Finlay (“Fin”) Sutton is a UK-based specialist prosthodontist focused exclusively on removable prosthodontics, creating high-quality dentures that restore function and confidence. After a challenging start in general practice, advanced training and mentorship led him to build a specialist referral practice in Garstang with his technician, Rowan.

He combines clinical work with teaching, writing, mentoring dentists worldwide, and hosting a monthly newsletter and free online study club.

Outside of dentistry, he enjoys golf, music, travel, and time with his wife Rachel and their two sons.

Lecture up to 6 hours

670 — Removable Prosthodontics

Live Signature All Day Course

The Cinderella Subject: How to Deliver Beautiful, Functional Dentures Your Patients Will Love

Removable prosthodontics is often seen as the “Cinderella subject” in dentistry. It is overlooked, under-taught, and frequently avoided. Yet for many patients, removable dentures remain the only realistic or preferred option, whether conventional or implant-supported.

In this highly practical session, Dr Finlay Sutton will share step-by-step protocols to help clinicians deliver predictable, comfortable, and beautiful complete dentures, partial dentures, immediate dentures, and implant-supported overdentures. The focus is on real-world techniques that can be applied immediately in daily practice, from diagnosis and design, to impressions, occlusion, tooth positioning, fitting, and long-term maintenance.

Drawing on over 25 years of clinical experience and thousands of documented cases, Dr Sutton will demonstrate how thoughtful design, meticulous attention to detail, and simple, reproducible workflows can transform patient outcomes, even in complex situations where implants are not possible, or where implant-supported solutions need to be integrated into removable prosthodontics. You will leave with greater confidence and a clear framework to approach both conventional and implant-supported removable prosthodontics as a high-value, life-changing solution and not as a last resort.

Upon completion of this session, attendees should be able to:

- Provide clear, step-by-step protocols for designing and delivering complete dentures, partial dentures, immediate dentures, and implant-supported overdentures that are esthetic, stable, and functional.
- Approach removable prosthodontics as a highly rewarding treatment option, even for complex cases where fixed solutions are not possible or appropriate.

JANUARY 27'

Dr. Mario Rotella

Prosthodontist

Dr. Mario Rotella, F.R.C.D.(C), is a certified specialist in Prosthodontics, focusing on complex aesthetic and functional rehabilitation of natural teeth and implants, including veneers, crowns, bridges, and dentures.

His practice blends traditional and minimally invasive techniques, emphasizing all-ceramic restorations and partial restorations. Dr. Rotella has presented at dental meetings, published in peer-reviewed journals, and maintains current expertise through ongoing education to provide evidence-based care.

He is a member of the Royal College of Dental Surgeons of Ontario, the Ontario Dental Association, the Association of Prosthodontists of Ontario, and the American College of Prosthodontists.

Dr. Rotella receives product and/or financial support from Straumann.

Lecture up to 2 hours

149 — Multi-disciplinary Topics

Worn But Not Forgotten: Mastering Diagnosis & Treatment Planning

Tooth wear can quietly progress for years, but when patients finally seek help, clinicians face complex challenges: altered occlusion, loss of vertical dimension, esthetic concerns, and restorative space limitations.

In this interactive session, attendees will work together in small-group teams to diagnose and treatment-plan a real generalized wear case. Through guided discussion, photos, records, and material considerations, you will refine your approach to restoring function, longevity, and patient confidence.

Upon completion of this session, attendees should be able to:

- Recognize key patterns and underlying causes of generalized dental wear to improve diagnostic accuracy.
- Develop a comprehensive, step-by-step treatment plan to restore function and esthetics in a wear case.

FEBRUARY 27'

Dr. Corey Anolik

Lecture up to 2 hours

149 — Multi-disciplinary Topics

Dr. Corey Anolik discovered his passion for dentistry while working as a dental assistant in college, inspired by the impact he could make on patients' lives. He earned his DDS from the Baltimore College of Dental Surgery in 2006, completed a hospital-based residency at Albert Einstein Medical Center, and now practices alongside his father.

Dr. Anolik is a Fellow of the Academy of General Dentistry, an instructor for Patterson Dental's CEREC system, and active in dental leadership, including serving on the Southern Maryland Dental Society board and as president of the Capitaligners Invisalign study club.

He and his wife Rachel have three sons, enjoy travel, Italian food, and the ocean, and he is an avid fan of the Ravens, Orioles, and New York Rangers.

Dr. Anolik receives product and/or financial support from Align Technology.

Function First Class III Case: Comprehensive Treatment Planning for the Class

In this interactive session, Dr Corey Anolik presents a complex case involving an adult patient with Class III malocclusion and lower anterior crowding. What begins as a request for orthodontic treatment becomes a deep exploration of comprehensive diagnosis and interdisciplinary decision-making.

Participants will review the case data and collaborate in small groups to determine an optimal treatment path, weighing the functional, restorative, and esthetic implications of each choice.

This case invites clinicians to rethink sequencing and priorities, where function drives planning and esthetics emerge as a natural outcome of sound principles.

Upon completion of this session, attendees should be able to:

- Identify key diagnostic factors that influence sequencing and term functional stability.
- Apply a function-first philosophy in comprehensive adult orthodontic treatment planning that allows esthetics to evolve as a secondary, yet enhanced, outcome.

MARCH 27'

Dr. Sunny Virdi

Lecture up to 2 hours

149 — Multi-disciplinary Topics

Dr. Sunny Virdi maintains a full-time ownership role in a group private practice in Winnipeg, Manitoba. Dr. Virdi has received postgraduate training in the latest techniques regarding isolation, adhesion, materials science and esthetic dentistry.

Dr. Virdi is a fan of collective learning and always keen to share his experience by participating in multiple study clubs. He is a member of the Canadian Dental Association and the Manitoba Dental Association.

Dr. Virdi receives product and/or financial support from Solventum and Curion.

The Ortho-Restorative Connection

This program explores the essential connection between orthodontics and restorative dentistry, emphasizing how coordinated, interdisciplinary treatment leads to healthier, more predictable, and more esthetic patient outcomes. Participants will learn how strategic tooth movement can enhance restorative possibilities—and how restorative planning can guide orthodontic decisions—creating a seamless workflow within a collaborative practice.

Through case-based learning, practical communication strategies, and clinical guidelines, the program highlights the benefits of working closely with colleagues in the same office. Participants will gain insight into shared treatment planning, timing of care, digital integration, and how to ensure that orthodontic and restorative goals support one another.

Upon completion of this session, attendees should be able to:

- Explain the fundamental relationship between orthodontic tooth movement and restorative treatment planning.
- Apply clinical examples and strategies that illustrate successful orthodontic–restorative collaboration in everyday practice.

APRIL 27'
Dr. Bill Claytor

Dr. J. William "Bill" Claytor, Jr., DDS, FAGD, MAGD, has practiced in Shelby, North Carolina since 1982. He earned his DDS from the University of North Carolina School of Dentistry and completed a General Practice Residency at the Medical University of South Carolina.

He holds Fellowship and Mastership in the Academy of General Dentistry and a Graduate Certificate in Chemical Dependency Counseling. Dr. Claytor is nationally recognized for his work supporting dental professionals with addiction, burnout, and mental health, and serves with North Carolina Caring Dental Professionals.

He has lectured nationally, taught at UNC and East Carolina, and was appointed Adjunct Professor in Operative Dentistry at UNC in 2017.

Lecture up to 2 hours

346 — Opioids, controlled substances, and pain management

NC Dental Opioid Update - Live Zoom Session

Dr. Claytor will present this course specifically tailored to our dental practices as an update on the latest developments related to the opioid epidemic and evolving opioid prescribing guidelines.

The presentation will focus on new and relevant changes in clinical recommendations, current prescribing trends, and practical approaches to managing acute dental pain while minimizing opioid use.

Throughout the course, we will also address common clinical questions and real-world scenarios that practitioners encounter, including patient expectations, alternative pain management strategies, and effective communication techniques to support safe and responsible care.

Upon completion of this session, attendees should be able to:

- Understand the opioid epidemic's impact on dental care in the U.S.
- Recognize risks of fentanyl and fentanyl-laced stimulants on patient safety
- Examine how cannabis use affects dental treatments and outcomes
- Apply evidence-based alternatives to opioids, including acetaminophen-ibuprofen and new non-opioid options
- Assess benefits and use of long-acting anesthetics for pain management
- Create strategies to enhance pain control while reducing opioid dependency

MAY 27'

Dr. Sreenivas Koka

Live Signature All Day Course

Dr. Sree Koka, a native of Romford, Essex, UK, earned his DDS and MS in Prosthodontics from the University of Michigan, an MBA from MIT Sloan, an MAS from Johns Hopkins, and a PhD from the University of Nebraska.

A diplomate of the American Board of Prosthodontics and Fellow/Regent in leading dental organizations, he has received multiple teaching awards, including MIT's MacVicar Award.

Dr. Koka has extensive experience in private practice, Mayo Clinic, and academia, with 180+ invited lectures and over 100 publications.

Lecture up to 5 hours

770—Self-Improvement

What Really Matters in Life

Do you worry that you will live a life that doesn't matter? That you will have regrets about all that you could have done... but didn't? This presentation speaks to these fears and will transform you into a person who takes on new challenges, makes the world a better place and leaves you with few, if any regrets.

By focusing on lessons learned from life experiences, also known as the school of hard knocks, research from top scientists, and the wisdom shared with successful people, Dr Koka will show you how to live a fulfilling life.

Upon completion of this session, attendees should be able to:

- Identify what really matters in life. Define the path to as few life regrets as possible.
- Identify how to live a life of true meaning.

THE FINE PRINT

Registration

These are virtual and live lecture, demo, and peer discussion programs suitable for all dentists, dental students, and business professionals regardless of prior experience who are members of this study club.

Disclaimer

Some information or presentations may include controversial materials or commercial references.

Carolina Collaborative Study Club cautions all course participants that there is potential risk to using limited knowledge when incorporating new techniques and procedures into their practices, especially when the continuing education program has not provided them with supervised clinical experience in the techniques or procedures to ensure that they have attained competence.

Substitutions

This brochure represents the speakers/programs established at the time of publication; however, speaker cancellations occasionally occur for reasons beyond our control. In the event of such an occurrence, speaker/ program substitutions may be made without prior notice.

Code of Conduct

We are committed to ensuring a safe and respectful meeting environment that is free of harassment, bullying, or offensive comments and/or behavior toward others.

We expect all participants whether attending live or virtual sessions to abide by this Code of Conduct policy on all online platforms, or in venues at a meeting, including ancillary events and official and unofficial social gatherings.

- Exercise consideration and respect in your speech and actions.
- Refrain from demeaning, discriminatory, or harassing behavior and speech.

Up to 23 Credits Available

Of which 23 hours will be submitted by Carolina Collaborative Study Club.
